Pigmentol Anio

HIGH PERFORMANCE
ANIONIC PIGMENT DISPERSIONS

SALIENT FEATURES

- are main colour components of anionic finish coats on leathers in general.
- are fine enough to get well embedded in the polymer films based on acrylics, urethanes or proteins normally used in leather finishing.
- can be easily combined with one another to form any shade and tone desired.
- are readily compatible with all the anionic and non-ionic ingredients from the range of c&e.
