HIGH PERFORMANCE  
CATIONIC PIGMENT DISPERSIONS

## SALIENT FEATURES

- Are main colour components of cationic finish coats on leathers in general.
- Facilitate very light films which, in turn, help in getting unloaded appearance.
- Are well held by the cationic polymers usually applied during leather finishing.
- Can be easily combined with one another to form any shade and tone desired.
- Are readily compatible with all the cationic and non-ionic ingredients from the range of c&e.
