HIGHLY PERFORMANCE
CATIONIC AQUEOUS FINISH

SALIENT FEATURES

COLORKAT

- have been designed as chief colouring ingredients for cationic finishing formulations thanks to their outstanding tinctorial strength and brillancy.
- impart rapid uniformity and deepen the colour of the leather surface up to any extent desired.
- serve the purpose of readymade refreshers for nubuck and suede articles maintaining elegance, velvety feel and writing nap effect.
- are easily miscible with one another and are capable to yield any desired shade and tone in the colour spectrum

PRECAUTION

Colorkats are strongly cationic in nature and are strictly meant for cationic media.
