ANIONIC METAL COMPLEX DYE SOLUTIONS

SALIENT FEATURES

ANIOSPARK

- Is tuned to enhance colour intensity, depth and brilliance to the commendable level in any finish coat from the staining bottom to the top.
- Is immensely useful for colour adjustments in a variety of leathers, thanks to their easy compatibility with aqueous and non-aqueous media.
- Their high concentration facilitates in modifying the tone of leather in relatively small quantities thereby diminishing the unwanted exposure of the leather to the solvents.
- Aniospark colours are easily miscible with one another and any tone can be got by permuting combinations of the existing ones.
