HIGHLY CONCENTRATED
ANIONIC METAL COMPLEX DYE SOLUTIONS

SALIENT FEATURES

NOVOLINE

- have been especially designed for enhancing tinctorial strength, depth and brilliancy in the finish coats starting from staining, base to top.
- possess enormous capacity to modify tone and are easily compatible with one another to attain the desired shift in the colour spectrum.
- are appreciably effective in both aqueous and non-aqueous media.

PRECAUTION

Novoline are strongly anionic in nature and are strictly meant for anionic media.
